## WORK EXPERIENCE

### Software Engineer

Newgen Software Technologies Ltd.

08/2018 – Present

Noida, India

Deals in BPM, ECM & CCM products across countries

#### Achievements/Tasks

- I developed back-end systems with RESTful Webservices in Java and Spring Framework, Jersey and Oracle SQL
- I helped automate asset monitoring and reporting processes for Citi Bank by creating interactive dashboards
- We make applications that thousands of bank employees across multiple regions use to monitor and report assets and securities

## PROJECTS

Handwritten Character Recognition using ML : Using the MNIST dataset for handwritten characters, we worked on a supervised model to recognize characters using gradient descent learning algorithm with backpropagation for modifying weights and biases. This was done to convert physical documents to online soft copies. We achieved an accuracy of over 96% in the process (08/2017 – 01/2018)

Online Banking System : I built a virtual bank account with functionalities for account creation, money deposit and withdrawal and account deletion using Java, Servlets, JSP and an RDBMS like MySQL database (06/2017 – 07/2017)
